

TABLE OF CONTENTS

Introduction	V
A combined polarization-Kelvin probe force microscopy approach for investigation of low temperature diffusion processes K. Neuhaus	1-8
Applications of particle tracking microscopy methods on biomaterials research A. Papagiannopoulos	9-16
Classification of White Blood Cell Types from Microscope Images: Techniques and Challenges Khamael Al-Dulaimi, Jasmine Banks, Vinod Chandran, Inmaculada Tomeo-Reyes and Kien Nguyen	17-25
Evaluated organization of mitochondria and antitumor effects of meclizine chloridrate associated with synthetic phosphoethanolamine in human negative triple breast cancer M.G.L. Silva, D.C. Rabelo, A.C. Moraes and D.A. Maria	26-32
Evaluation of ultrastructural modified induced by phosphoethanolamine and liposomal formulation in human glioblastoma cells A.C. Moraes, L.B. Knop, S.C. Afeche, N.F.T. Santos, A. Souza-Imberg, D.C. Rabelo, M.G. Laveli-Silva and D.A. Maria	33-38
Exosome investigation: the approach of electron microscopy M.A. Di Bella	39-44
Fluorescence dyes and their usefulness in yeast cell research Abhishek Sinha	45-52
Fluorescence microscopic analysis of mannose receptor expression and activity as a cell marker for tumor associated-macrophages B. Arteta, A. Herrero, A. Benedicto, L. Gomez-Santos, D. Alonso-Alconada, E. Hilario and A. Alvarez	53-61
How glycosylation is involved in metastatic process shown by light microscopy Laura Gomez-Santos, Beatriz Arteta, Aitor Benedicto, Daniel Alonso-Alconada, Tatsuro Irimura, Enrique Hilario and Antonia Alvarez	62-69
Inflammatory mediators and the emerging anti-inflammatory therapies in pediatric brain injury D. Alonso-Alconada, A. Álvarez, L. Alonso-Alconada, L. del Arco, M.J. Canduela, A. Caballero and E. Hilario	70-79
Mechanical and microscopic characterization of Al-Zn-Sn ternary alloys and their microstructural modification by cold working M.L. Mendoza López, J. Pérez Meneses and J.J. Pérez Bueno	80-83
Setting up a Super-Resolution Microscopy Facility I. Coto Hernández, C. Knox, S. Mohan and N. Jowett	84-91
The role of cytokines in the progress of brain damage after neonatal hypoxia-ischemia D. Alonso-Alconada, E. Hilario, B. Arteta, M.J. Canduela, A. Benedicto, L. Gómez-Santos and A. Álvarez	92-100
Transmission Electron Microscopy of Pediatric Small Round Blue Cell Tumors Consolato Sergi	101-112

Uncovering antitumor T cell-mediated immune response through light microscopy A. Benedicto, B. Arteta, L. Gomez-Santos, D. Alonso-Alconada, A. Alvarez and E. Hilario	113-118
Usage of microscopy techniques for the detection of biofilms among various microorganisms M. Alper Ergin	119-125
Will you turn the light off for me? R. Elsaesser, P. Holroyd and H. Wolff	126-133
